引文與參考書目

Introduction

Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morrow *et al.*, 1998), it is speculated that the autonomic nervous activity might be changed when acupuncture at the P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some studies have shown that vagal modulation, and the restoration of vagal modulation is associated with the improvement

You are currently running version 19.2.0.13018. Would you like to learn more about EndNote X9.3.3?

Important: When you open an existing library in X9.3 and later, it will create a converted version for use with this new database engine. The original library will not be changed, so you can continue using it X9.2 or earlier. Alternatively, use Sync to move your data across systems and versions.

EndNote X9.3.3 Update

This update contains the following:

- ✓ Resolved a problem where renamed file attachments would not update during sync
- ✓ Issue importing PDFs using Kopernio on Firefox has been resolved
- ✓ Resolved issue with syncing Group Sets, Groups, and File Attachments in read-only shared libraries
- ✓ Corrected issue where display preferences were not saving

Introducing Kopernio

Get PDFs into EndNote faster

Access millions of research papers in one click.

Kopernio is a browser plugin that automatically uses your existing library subscription and open access alternatives to find the full-text PDF you need right when you need it, both on and off campus.

Kopernio integrates with Web of Science, Google Scholar, PubMed and 20,000 other sites.

Used by researchers at over 2,500 academic institutions worldwide.

Output Formats with Corresponding Import Options

To import references, you must first save references from an information provider as a plain text (.txt) file in a tagged format. If references are sent to you in the body of an email, save the email to a plain text file for importing.

1. In EndNote, select the File > Import > File option to select the tagged text file that you saved from the information provider.
2. Select the appropriate import filter from the Import Filter menu. The Other Filters option opens a dialog that displays all filters in the EndNote product.
All filters direct tagged bits of bibliographic information to corresponding EndNote fields.
3. Start the import process by clicking the Import button.

The list below provides a direct export of references to EndNote. It is only a small list of information providers. Note the following before you begin.

- There are hundreds of import filters available in the EndNote Filters folder.
- Select Edit > Import Filters> Open Filter Manager to look into the EndNote Import Filters table for information on how to open, view, and edit filters. Many of the filters include a Comments and Limitations section with tips on how to download references for importing into EndNote.
- Go to our Web site at <http://www.endnote.com/support/enfilters.asp> for updated information and import filters, including detailed information on how to save and download data directly to EndNote.

See [Importing Reference Data into EndNote](#) for more detailed information about importing.

See [General Importing Instructions](#) for more step-by-step instructions.

Information Provider	Recommended Download Format	Import Filter
AARP AgeLine	http://research.aarp.org/ageline/home.html There is no method for downloading data from this database. Instead, save the results screen as a plain text file with your web browser's Save command. The resulting text file contains tags which are preceded by 18 spaces.	Ageline (AARP) filter
ACM Digital Library (Association for	Users with subscription access to this web site can save multiple records to a BINDER. Once saved, you can export the records in an EndNote format. Non-subscribers can download one record at a time:	EndNote Import

SUPPLEMENTARY INFORMATION

doi:10.1038/nature20584

Supplementary table 1 | Equations describing the ‘Likely water’ cluster hull and cluster overlaps in the multidimensional feature-space.

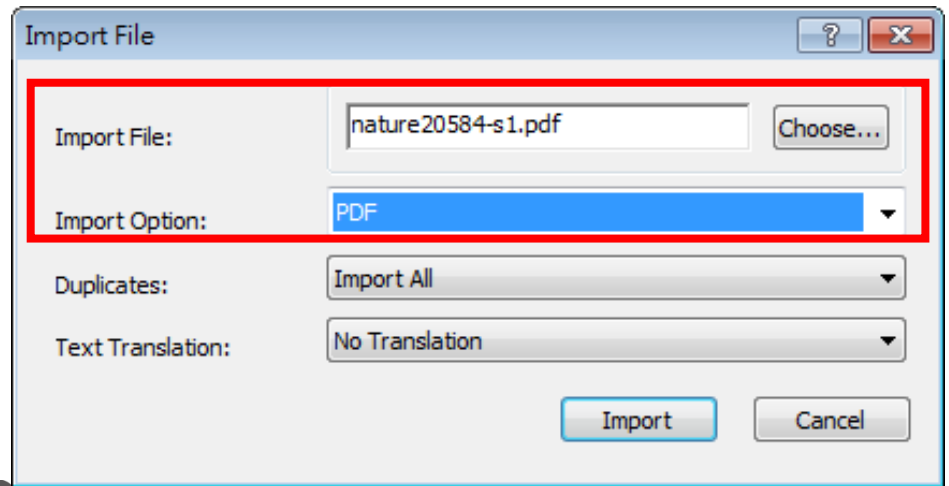

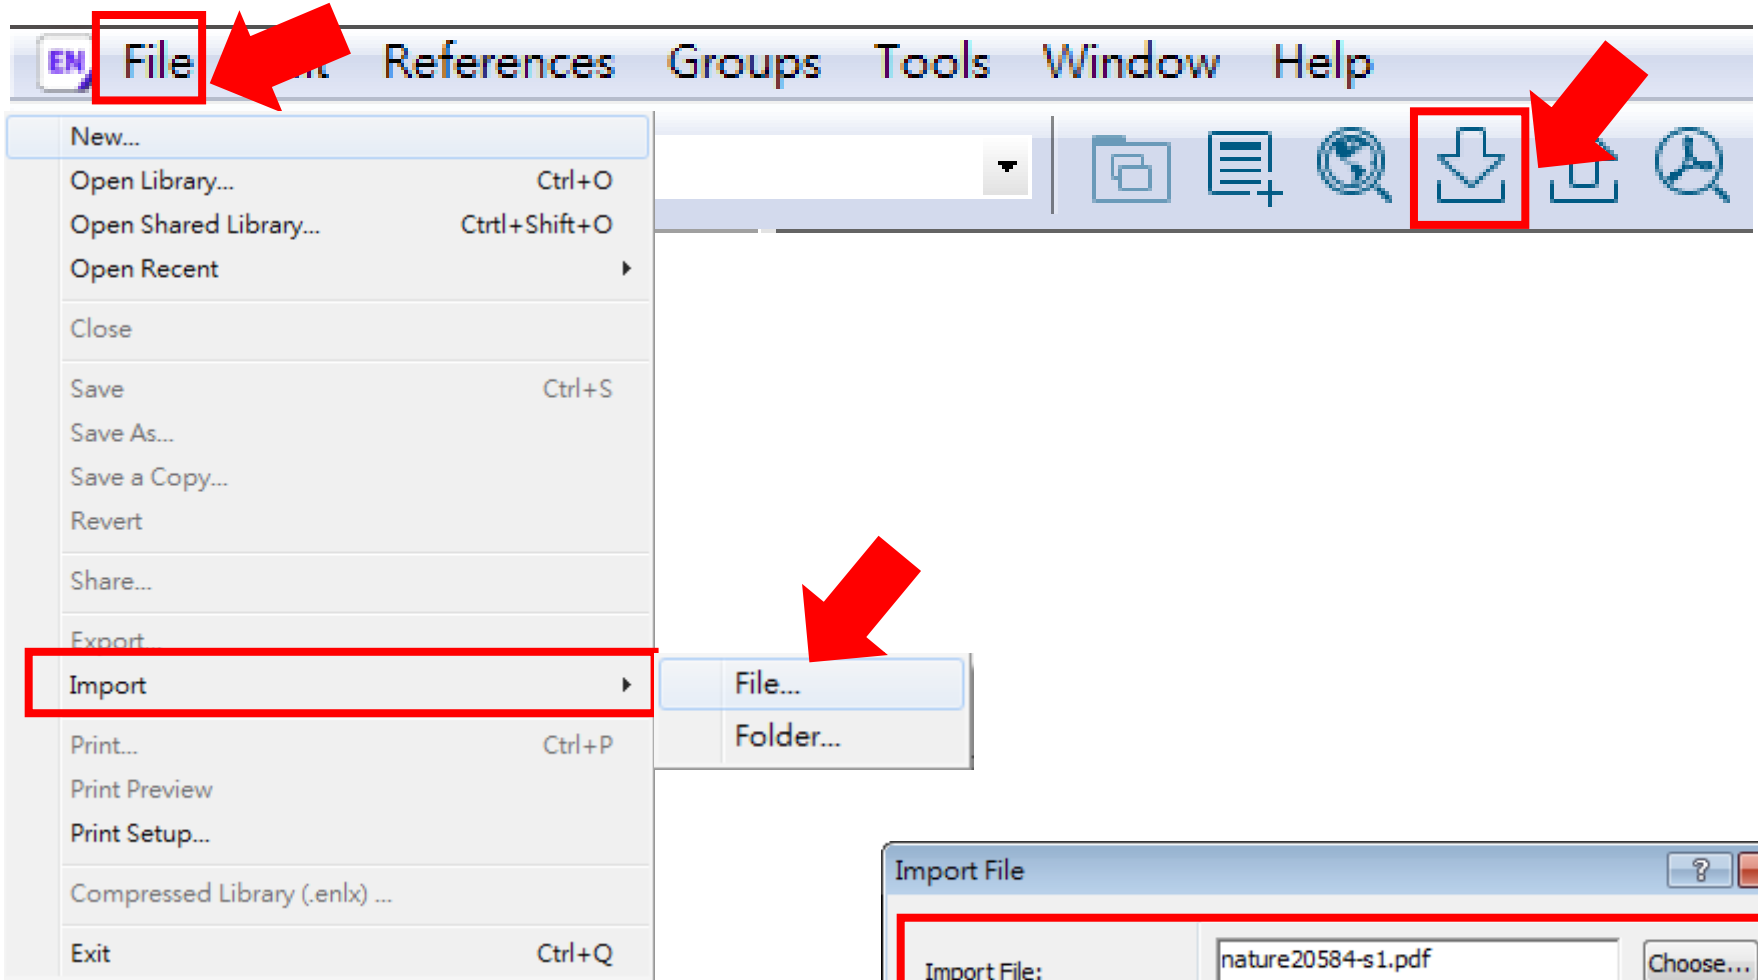

SUPPLEMENTARY INFORMATION

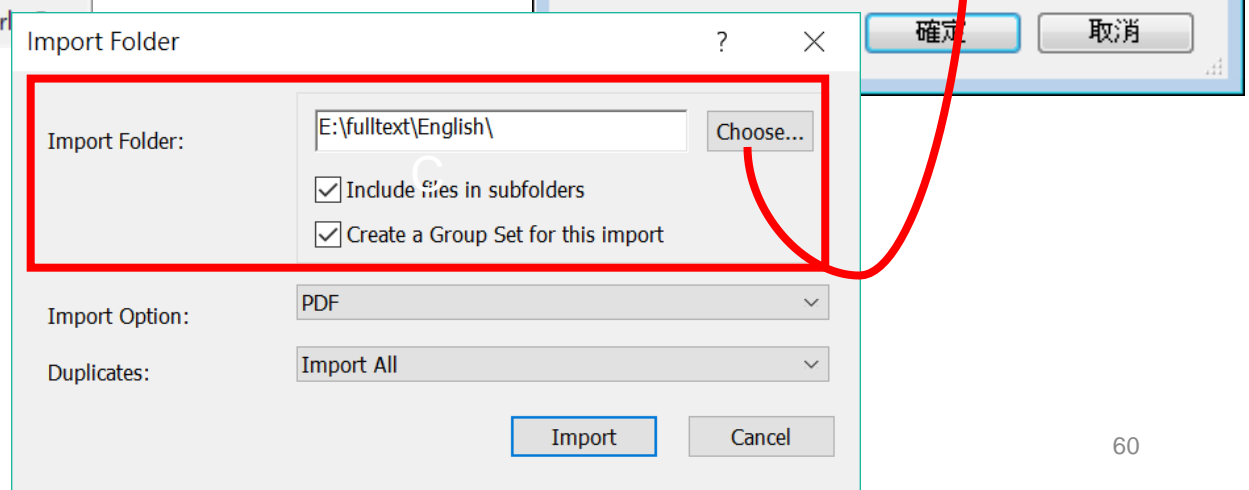

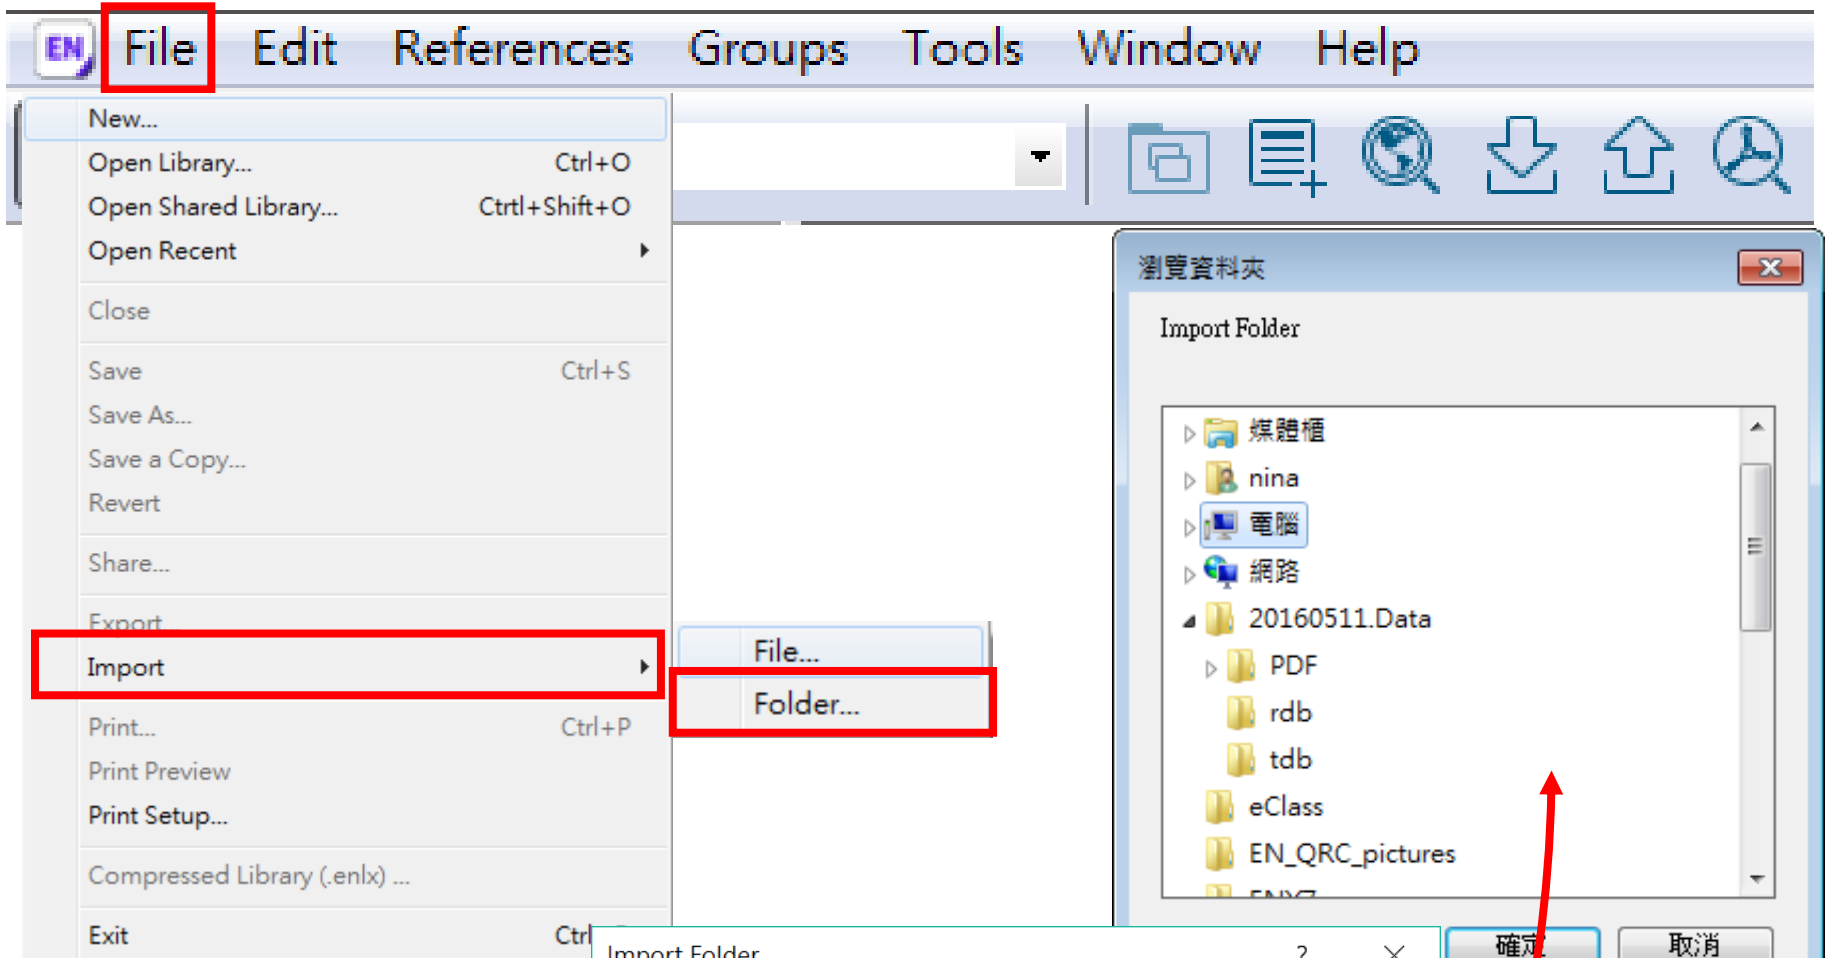

doi:10.1038/nature20584

Supplementary table 1 | Equations describing the ‘Likely water’ cluster hull and cluster overlaps in the multidimensional feature-space.

These equations describe the ‘Likely water’ cluster in the multidimensional feature-space. By definition, part of this cluster contain pixels that are not water, and request additional processing steps to be properly assigned. The method section provides details about the usages of this equations within the expert system classifier.

Name	Description	Equations describing the “Likely water” cluster hull and cluster overlaps in the multidimensional feature-space
water1	Water cluster where NDVI <0	$b('value') < 0.62 \&\& (((b('hue') < ((-9.867784585617413 * b('nd')) + 238.26034242940045)) \&\& (b('hue') > (-12960.000000000335 * b('nd')) - 12714.048607819708)) \&\& (b('hue') > ((23.627546071775214 * b('nd')) + 255.53176874753507))) \vee (((b('hue') < (-54.685799109352004 * b('nd')) + 215.15052322834936)) \&\& (b('hue') < ((23.627546071775214 * b('nd')) + 255.53176874753507)) \&\& (b('hue') > (-7.321079389910027 * b('nd')) + 224.6166270396205))) \vee (((b('hue') < (-172.0408163265306 * b('nd')) + 191.69646750224035)) \&\& (b('hue') < (-$

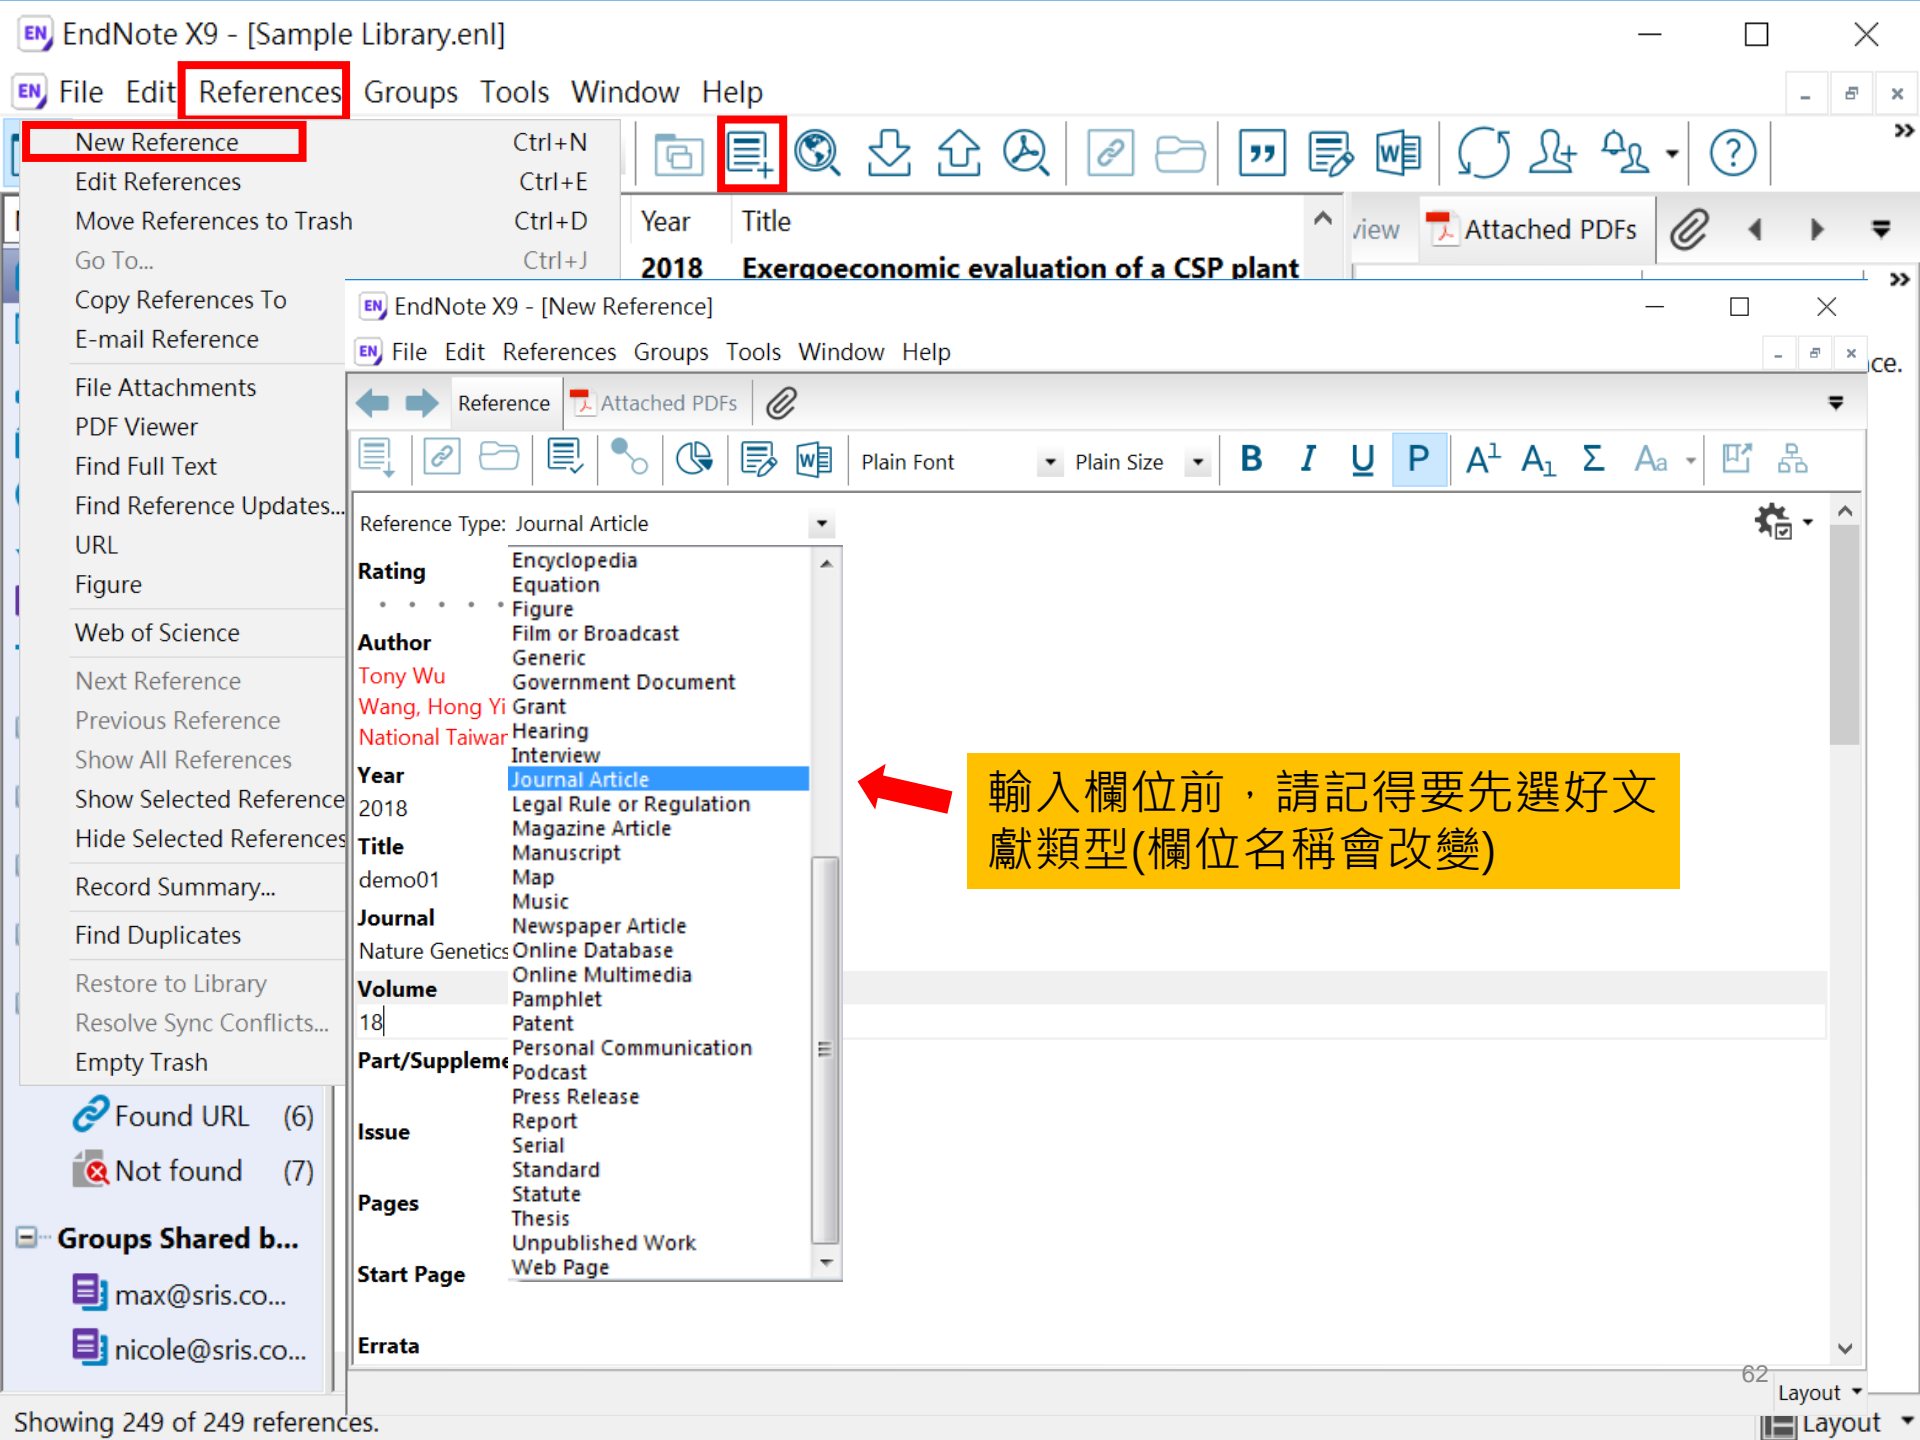

資料匯入 – 自行鍵入

須注意三個地方:

1. 文獻類型[Reference Type]要選擇正確。
2. 一個作者一行，兩個作者兩行，以此類推。
3. 當以英文輸入時，作者姓氏在前要加逗點，
如: Wang, Da Min 姓氏在後不用加逗點。

偷吃步?

可用Online Search或是Google Scholar匯入

Little is known about PM1 effects on respiratory health, relative to larger size fractions (PM2.5). To address this literature gap, we assessed associations between PM1 exposure and asthmatic symptoms in Chinese children and adolescents, compared with PM2.5 (Strotz, 1956; Teesalu, Airaksinen, Tuulonen, Nieminen, & Alanko, 1997).

METHODS: A total of 59,754 children, aged 2-17years, were recruited from 94 kindergartens, elementary and middle schools in the Seven Northeast Cities (SNEC) study, during 2012-2013.

Strotz, R. H. (1956). MYOPIA AND INCONSISTENCY IN DYNAMIC UTILITY MAXIMIZATION. *Review of Economic Studies*, 23(62), 165-180.

Teesalu, P., Airaksinen, P., Tuulonen, A., Nieminen, H., & Alanko, H. (1997).

Fluorometry of the crystalline lens for correcting blue-on-yellow perimetry results. *Investigative Ophthalmology & Visual Science*, 38(3), 697-703.

Little is known about PM1 effects on respiratory health, relative to larger size fractions (PM2.5). To address this literature gap, we assessed associations between PM1 exposure and asthmatic symptoms in Chinese children and adolescents, compared with PM2.5 (Strotz, 1956; Teesalu, Airaksinen, Tuulonen, Nieminen, & Alanko, 1997).

METHODS: A total of 59,754 children, aged 2-17years, were recruited from 94 kindergartens, elementary and middle schools in the Seven Northeast Cities (SNEC) study, during 2012-2013.

Strotz, R. H. (1956). MYOPIA AND INCONSISTENCY IN DYNAMIC UTILITY MAXIMIZATION. *Review of Economic Studies*, 23(62), 165-180.

Teesalu, P., Airaksinen, P., Tuulonen, A., Nieminen, H., & Alanko, H. (1997).

Fluorometry of the crystalline lens for correcting blue-on-yellow perimetry results. *Investigative Ophthalmology & Visual Science*, 38(3), 697-703.

Abstract: Chronic allergic inflammatory diseases are a major cause of morbidity, allergic asthma alone affecting over 300 million people worldwide. Epidemiological studies demonstrate that environmental stimuli are associated with either *protection* or *prevention* of disease. Major reductions in asthma prevalence are documented in European and US farming communities. Protection is associated with exposure of mothers during pregnancy to microbial breakdown products present in farm dusts and unprocessed foods, and enhancement of innate immune competence in the children. We sought to develop a scientific rationale for progressing these findings towards clinical application for primary disease prevention. Treatment of pregnant mice with a defined clinically-approved immune-modulator was shown to markedly reduce susceptibility of their offspring to development of the hallmark clinical features of allergic airway inflammatory disease. *Characteristically,*

EffiCiency and Safety of an eLectronic cigAReTte (ECLAT) as Tobacco Cigarettes Substitute: A Prospective 12-Month Randomized Control Design Study

Pasquale Caponnetto^{1,2}, Davide Campagna^{1,2}, Fabio Cibella³, Jaymin B. Morjaria⁴, Massimo Caruso⁵, Cristina Russo^{1,2}, Riccardo Polosa^{1,2*}

Abstract

Background Electronic cigarettes (e-cigarettes) are becoming increasingly popular with smokers worldwide. Users report buying them to help quit smoking, to reduce cigarette consumption, to relieve tobacco withdrawal symptoms, and to continue having a "smoking" experience, but with reduced health risks. Research on e-cigarettes is urgently needed in order to ensure that the decisions of regulators, healthcare providers and consumers are based on science. Methods ECLAT is a prospective 12-month randomized, controlled trial that evaluates smoking reduction/abstinence in 300 smokers not intending to quit experimenting two different nicotine strengths of a popular e-cigarette model (Categoria; Arbi Group Srl, Italy) compared to its non-nicotine choice. GroupA (n=100) received 7.2 mg nicotine cartridges for 12 weeks, GroupB (n=100), a 6-week 7.2 mg nicotine cartridges followed by a further 6-week 5.4 mg nicotine cartridges. GroupC (n=100)

強化連結Web of Science

Endnote X9
新功能!

若 reference 的「Accession Number」具有 Web of Science ID 或是 PubMed ID 等識別碼，即可串連至 Web of Science。

亦可針對整個 Group 中的 references，執行「Create Citation Report」功能。

※ 使用此功能需有Web of Science資料庫權限

Accession Number(識別碼)

The screenshot shows the EndNote X9 interface. The main window displays a list of references in a table format. The first reference is selected, and its details are shown in a right-hand pane. The 'Accession Number' field in this pane is highlighted with a red box, showing the value 'WOS:A1992HA99100004'. A yellow text box at the bottom right explains that references imported from WOS or Pubmed will have an Accession Number, which is the identification code.

摘要

Background. In atopic asthma, activated T helper lymphocytes are present in bronchial-biopsy specimens and bronchoalveolar-lavage (BAL) fluid, and their production of cytokines may be important in the pathogenesis of this disorder. Different patterns of cytokine release are characteristic of certain subgroups of T helper cells, termed T(H1) and T(H2), the former mediating delayed-type hypersensitivity and the latter mediating IgE synthesis and eosinophilia. The pattern of cytokine production in atopic asthma is unknown.

Methods. We assessed cells obtained by BAL in subjects with mild atopic asthma and in normal control subjects for the expression of messenger RNA (mRNA) for interleukin-2, 3, 4, and 5, granulocyte-macrophage colony-stimulating factor (GM-CSF), and interferon gamma by in situ hybridization with P-32-labeled complementary RNA. Localization of mRNA to BAL T cells was assessed by simultaneous in situ hybridization and immunofluorescence and by in situ hybridization after immunomagnetic enrichment or depletion of T cells.

Background Data for trends in prevalence of asthma, allergic rhinoconjunctivitis, and eczema over time are scarce. We repeated the International Study of Asthma and Allergies in Childhood (ISAAC) at least 5 years after Phase One, to examine changes in the prevalence of symptoms of these disorders.(Asher et al., 1995; Asher et al., 2006).

Findings Phase Three was completed a mean of 7 years after Phase One. Most centres showed a change in prevalence of 1 or more SE for at least one disorder, with increases being twice as common as decreases, and increases being more common in the 6-7 year age-group than in the 13-14 year age-group, and at most levels of mean prevalence(Bousquet et al., 2008; Constantine, Bressler, Petroni, Metcalfe, & Carter, 2018; Guenter et al., 2018).
